Update:

Safety and Security

Vaping: Our experience, beginning last spring, suggests an increase in incidences with vaping. In communicating with other schools, we are discovering similar experiences occurring on other campuses. In reviewing how vaping and vaping materials are marketed in popular culture, our concern grows.

Unfortunately, vapes are relatively easy to obtain, they gained momentum in an unregulated market and They are promoted as a "safe" alternative to smoking.

We have been addressing the use of these devices on a case by case basis.

We are now addressing the issue with a comprehensive education program designed to prevent the use of vapes as well as engage parents and community in the process.

Communication:

Parents: [Letter](#) detailing vaping issues, federal/state law, Board and school policy sent out January

Students: Letter detailing vaping issues, federal/state law, Board and school policy sent out January

Training:

Staff: Staff training on vapes including types of vapes, smells produced and data on student use.

Advisory/Class Forums: Additional communication/education for students

Presentation:

Healthy Connections-Parent/Community presentation with outside expert. This event is being designed and delivered in concert with AMS.
